

## Electric Power

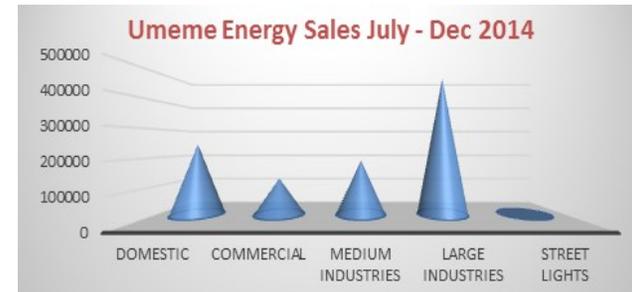

### Transmission

Large Hydros took the lead (82.9%) in supplying electric energy while the lowest purchases (0.97%) were made from imports from Kenya and Rwanda.

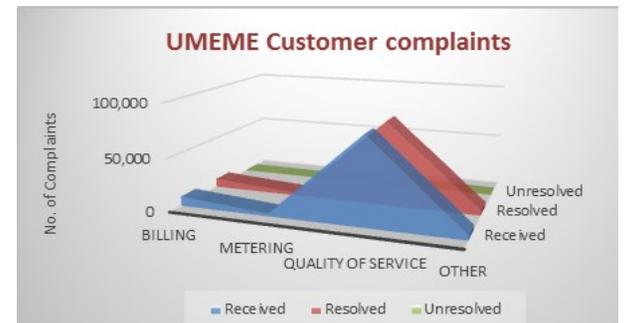

### Energy sales to different customer categories (MWh)

UMEME sold the largest portion (45.8%) of Energy to large industries since they do heavy work that requires plenty of Energy to run the machines. This was followed by domestic consumers (23.7%). The least Energy (0.1%) was used for street lighting.

### UMEME customer complaints

Most complaints (82.9%) emanated from the quality of services UMEME offers. These complaints had to do with too much load shedding, low response to connection needs and poor customer care.

## Statistical Brochure

### Issue: July—December 2014

(figures shown herein are for the period stated above)

## Ministry of Energy and Mineral Development

January 2015

By the end of December 2014, the biggest proportion of Energy (94.6%) had been sold to UMEME.

### Distribution

#### Electric power purchases in MWh

Peak hours are from 6:00 pm to 12:00 am. Off peak hours are from 12:00 am to 6:00 am. Shoulder hours are from 6:00 am to 6:00 pm. UMEME purchased most of its electric power during shoulder hours.

## Petroleum Products

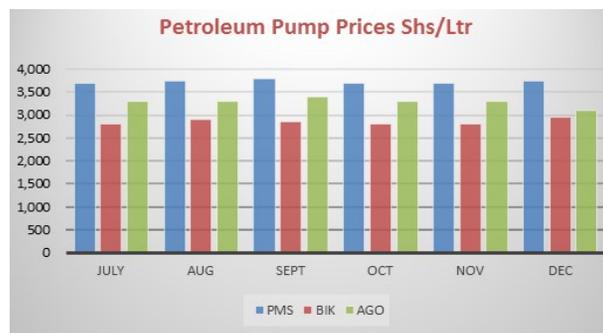

### Petroleum Sales ('000' cubic metres)

Of the total petroleum sales, gas oil contributed the biggest proportion (44.23%) to sales throughout this period, while LPG had the least sales (0.86%). On the other hand, no sales of Bitumen and IDO were recorded since both are ordered on demand for industries. This implies that during this period no activity on road construction took place.

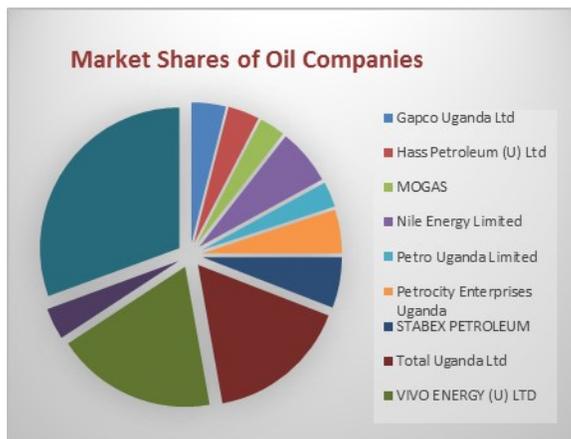

### Average Monthly Domestic Fuel Prices

In the months of October and November, prices of PMS/Petrol and BIK/Kerosene didn't change. However, due to festivity in December, prices shot up by 1.4% and 5.4%. This was caused by the high demand from the user's side. On the contrary, though supply of AGO/Diesel was sufficient, demand was very low causing the price to drop by 6.1%.

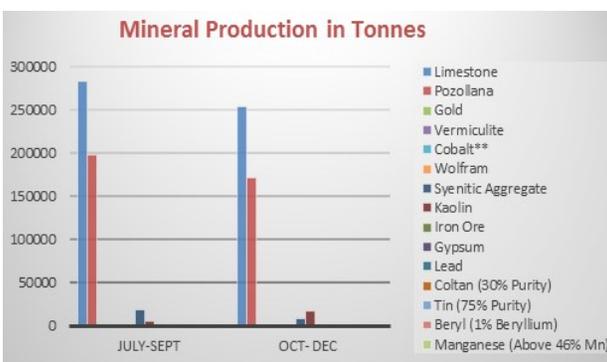

## Market Shares of Oil Companies

Among the 10 top companies in the oil industry, VIVO Energy (U) Ltd dominated the oil market by taking 18.61% of the entire market followed by Total (16.33%) This implies that the balance (65.06%) went to other oil companies.

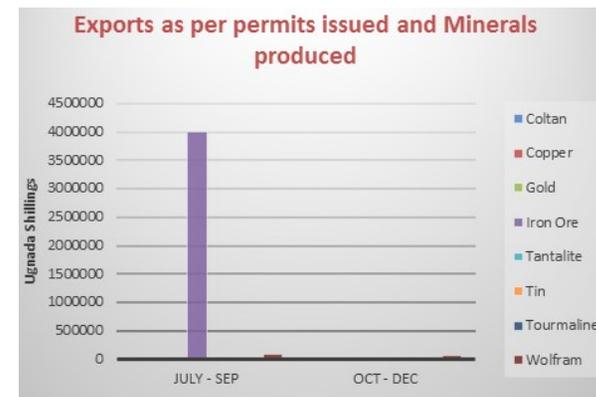

## Minerals

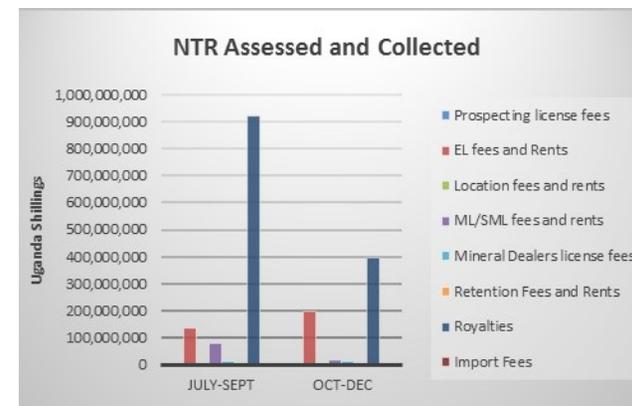

Limestone was the leading mineral produced with 55.87%. Tin (75% purity) was the least produced with only 0.001% of total mineral production.

## Mineral Exports as Per Permits Issued and for Minerals Produced

From July to September 2014, iron ore was noted to have been the most exported mineral ( 98.04%).

## NTR Assessed and Collected

In this period, it was noted that royalties were the biggest source of NTR worth 73.09%, followed by EL fees and rents (18.61%). No NTR was collected from retention fees and rents.
